

Press Release April 6, 2017

## Infant Bacterial Therapeutics AB (publ) Annual Report for 2016 has now been published

Infant Bacterial Therapeutics AB (publ) Annual Report 2016 is now available on the companies website [www.ibtherapeutics.com](http://www.ibtherapeutics.com).

A physical copy of the Annual Report can also be requested by contacting IBT at the address [info@ibtherapeutics.com](mailto:info@ibtherapeutics.com).

### **About Infant Bacterial Therapeutics AB**

Infant Bacterial Therapeutics AB (publ) ("IBT") is a pharmaceutical company with a vision to develop drugs influencing the human infant microbiome, and thereby prevent or treat rare diseases affecting premature infants. Using its extensive experience in live bacterial therapeutics and its well-developed knowledge of the action of *Lactobacillus reuteri*, IBT is developing its lead drug candidate IBP-9414, to prevent necrotizing enterocolitis ("NEC"), a fatal, rare disease that afflicts premature infants. IBT is further pursuing a second rare disease programme IBP-1016 for the treatment of an unmet medical need in gastroschisis, a severe disease in infants. By developing these drugs, IBT has the potential to fulfil unmet needs for diseases where there are currently no prevention or treatment therapies available.

The FDA and the European Commission have granted IBT Orphan Drug Designation, and the FDA have granted Rare Pediatric Disease Designation for IBP-9414 for the prevention of NEC.

IBT is listed on Nasdaq First North Premier with Erik Penser Bank as Certified Adviser.
